

Letters of Recommendation Guidelines

Applicants must submit 3 letters of recommendation in support of their application for acceptance into the Radiologic Technology Program at Wenatchee Valley College.

- At least one (1) letter should be from a professor in the sciences with whom they have taken classes.
- At least one (1) letter should be written by an employer/professional reference.
- At least one (1) letter should be from a professor in any subject matter with whom they have taken classes and/or employer/professional reference.

While we strongly recommend meeting the criteria listed above, these are not strict requirements. Ultimately, the letters applicants choose to include are up to their own discretion. Applicants should choose the letters of evaluation they believe will best support their application. Personal Letters of Recommendation will not be accepted.

Applicants will submit the Letters of Recommendation with the application online.
